The Cottonwood Springs Water Stewards is a volunteer communications committee of Save Red Rock. Its mission is to inspire water conservation and preserve the neighborhood’s natural habitat. For more information, visit www.saveredrock.com/water.

*** WINTER 2022-2023 ***

SEASONAL WATERING RESTRICTIONS

Our well levels are suffering historic lows, so everyone must do their part to save water! **NOW THROUGH FEB 28, SNWA is enforcing the Winter Water Schedule.** Watering on Sundays is never permitted. If you haven’t already done so, change your watering clock.

WATER ONLY ONE (1) DAY / WEEK

PROJECT UPDATE: CLOUD SEEDING

*The Water Stewards teamed up with Desert Research Institute to generate additional precipitation for Red Rock Canyon*

In September, Save Red Rock’s Water Steward Committee raised $100,000 to fund a winter cloud seed generator – fabricated and operated by the scientists at Desert Research Institute (DRI) – over the next two winters. The generator was placed intentionally to increase winter precipitation in Red Rock Canyon, benefiting the plant and animal life in the conservation area but also potentially helping to improve our well levels. Many of you donated to this cause and we thank you for your contributions.

As of this winter, the cloud seeder is up and running, bolstering winter storms over Red Rock Canyon. To keep an eye on how much new precipitation we’ve generated or to lean more though our webinar, visit [www.saveredrock.com/water](http://www.saveredrock.com/water).
2022 TOP WATER REDUCERS

Thank you to those who took extraordinary measures to save water this year, here are a few highlights. 54 Residents reduced water use. These 54 residents used 2,112,400 gallons less water than in 2021.

2 MILLION GALLONS SAVED!!!

The water stewards are currently working with Commissioner Justin Jones to add water conservation regulations to the Red Rock Overlay.

SPOT A LEAK?

This year, the village has seen a few major leaks, leading to more than 250,000 gallons of water loss. In order to shorten response time to these types of emergencies, please keep these numbers handy.

IF YOU SPOT A MAINLINE LEAK CALL
702-373-0332
(Aaron Gamble, SNWA)
&
702-875-4280
(BD Volunteer Fire Dept.)

Do not call SNWA customer service, as rural water protocol is separate from the Valley’s standard system. Report these contacts should be made aware of leaks immediately. VILLAGE MAINLINE LEAKS ONLY. RESIDENTIAL LEAKS SHOULD BE DEALT WITH VIA THE PROPERTY OWNER.

WATER SAVING HIGHLIGHTS WIFI SYSTEMS

B-hyve® technology helps you make watering decisions based on the ecological needs of your yard while giving you the freedom to control watering from anywhere with your smartphone. To date, B-hyve® has helped conserve over 100 billion gallons of water around the world. It’s the smarter, cheaper, greener way to water.

The stewards have tried out this product and recommend for efficiency and conservation. These timers range from $99-$169 and can be found at Home Depot, Amazon and Lowes.

POOL WATER IRRIGATION PROJECT

Dave Cook and Evan Blyth came up with an ingenious way to use the pool water to irrigate the park. Their efforts saved 50,000 gallons of water!
